else we can make
easier for you!**

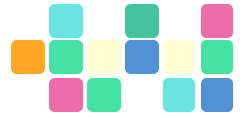

AZURE VIRTUAL DESKTOP PROFILES MANAGEMENT

DAVE GRAIN

Profiles Management

Challenges:

- Managing very large numbers of host pools.
- So many options when creating a new host pool.
- Keeping host pools consistent and aligned with each other.

Solutions:

- Create a host pool profiles for grouped settings.
- Manage these from a single window within Nerdio Manager for Enterprise.
- Keep all hosts pools aligned with the required setting by using a single window rather than going to each host pool individually.

USER INTERFACE REFRESH/MODERN UI

RAUL MORALES

Nerdio Manager for Enterprise modern UI: Timeline

7.0 (NerdioCon release) April 2025

Pages available in new UI:

- ❖ Workspace, Host Pools, & other AVD pages.
- ❖ Settings.
- ❖ Console Connect.

UI toggle to switch between old and new UI

7.1, 7.2, and future releases, May–July 2025

Additional pages available in the new UI:

- ❖ Desktop Images.
- ❖ Users & Roles.
- ❖ User Sessions.
- ❖ Product Updates.
- ❖ Other Pages.

By the end of 2025 (final milestone)

- ❖ All pages will be migrated to the new UI.

Throughout this process and into 2026

- ❖ Obtain feedback from customers.
- ❖ Continuously improve the new UI & UX.

7.3 release (major milestone), August 2025

- ❖ New features in development will be tailored for new UI.
- ❖ Pages available in old UI and new UI will now only be available with new UI.
- ❖ Some pages will be present with old UI.
