Agenda

It's a story, not just a presentation

Product scope

Demo (How I tell the story)

- **Nerdio components**
- **Types of deployments**
- **Image management review**

Art of the demo: It's not a presentation, it's a story

Relevant

- Selling to the business and current market conditions
- Use case studies during the demo
- Uncovering hidden value or pain points
- Try to tie each major feature to a metric that impacts the business.
 - Cost Savings
 - Faster Cloud Adoption
 - Meeting Microsoft MACC agreement requirements

Relatable

- Selling to the personal experience – connect with the person, not just the employee.
- Universal Truths Method
- Be authentic. Tell the story your way. If its meaningful to you, its meaningful to your customer/prospect.

Repeatable & reversible

- Front to back, back to front. And Middle out.
- You will be asked questions in the middle of a demo and must jump around. Its ok.
- Practice your demo multiple ways, at different value prop points.

Art of the demo: It's not a presentation, it's a story

Image management automation

- Create image source VM
- Modify/update source
- Nerdio image deployment

Deployment automation

- Workspace deployment
- Hostpool deployment
- Auto-scale automation setup
- Host pool properties

Mini stories (tailored to customer)

- Insights
 - AVD/Nerdio Health
 - Windows 365
 - AVD
 - Intune
- Endpoints and policies
- Applications and repositories
- Storage
- RBAC
- Advisor

Product scope: AVD/Cloud PC/Intune
